

Field Intelligence for Smarter Farms

www.fieldintech.com

Fieldin provides business intelligence services for commercial agriculture, helping growers manage and optimize pesticide applications, harvest activities and other critical field operations from a single platform.

Developed by farmers for farmers, Fieldin seamlessly connects tractors, machinery and in-field sensors to equip managers with actionable data that improves production and crop protection practices.

Smart Observations

Use our mobile scouting app to capture and report issues in the field, with geo-tagged photos and notes that complement your pest management program, harvesting, irrigation and spray schedules.

Smart Spraying

Remove the blindfold from spraying activities with real-time spray data that ensures optimal timing and execution of spray events, as well as alerts for application errors such as missed rows, double sprays or unsuitable weather conditions.

Smart Harvesting

Optimize harvest activities with real-time data for shakers (such as seconds per tree), sweepers, harvesters and other equipment, allowing managers to compare machines, operators, shaking patterns as well as yield data from various locations.

Smart Cultural Practices

Gain similar transparency into other key cultural practices, comparing operators, analyzing shifts, refilling operations and more, leveraging industry benchmarks and insights from the largest specialty crop data set in the industry.

Unrivaed Grower Support

Fieldin’s team takes care of the technology, so you can focus on farming.

Installation

Our technicians handle all sensor installations on your equipment, customizing our solution to fit your farm and cultural practices. Regular software updates keep you on the cutting edge of our Field Intelligence technology.

Integration

We integrate with your existing technologies and team members, with an easy-to-follow training program that gets managers up to speed on the platform in no time.

Grower Support

After installation and integration, our dedicated Grower Support team will regularly work with your team to ensure platform adoption, provide custom reports, set up alerts and troubleshoot issues.

What Our Customers are Saying

“ I manage multiple farms and am constantly on the go. With Fieldin, I saw value from Day 1. You simply don’t miss a thing. It’s as if we removed the blindfold. ”

Pegasus Orchards

“ Fieldin gives me a comprehensive agronomic viewpoint like never before. It’s helping our company be more efficient, and it’s already saving us money. ”

Brian Palla, Owner of Palla Farms
