UNICLED NECK & CHIN MASK

360° BEAUTY TECHNOLOGY

FREE-GENDER DESIGN

UNICLED NECK & CHIN MASK is a diode LED light emitting device that offers a safe combination of different wavelengths. It acts on the skin and cells, thus reducing oxidative stress and stimulating cellular energy production. The product offers two modes: neck and chin. Depending on the mode you choose, the device will directly apply one function or another, without you having to do anything. The main benefits that you will notice will be: reduction of neck wrinkles, thinning of the double chin and jawline slimming. In addition, the researchers argue that LED light therapy attacks adipocytes, which are cells that store fat and cause lipids to disperse. This therapy helps the body eliminate fat cells, providing a supreme triple action when applied to the neck and chin:

- LIFTS NECK
- REDUCES DOUBLE CHIN
- SLIMS JAWLINE

HOW TO USE

01. Clean and dry your face and neck before starting the treatment.
02. Select the desired treatment area: chin or neck. Turn on the device and let the treatment start for 20 minutes.
03. The device will turn off automatically after 20 minutes.

WHAT TO EXPECT

Users typically see a reduction in lines and wrinkles, and a loss of fat within 2 weeks of use (4 times a week). Optimal results will start to be seen after 1 month of treatment.

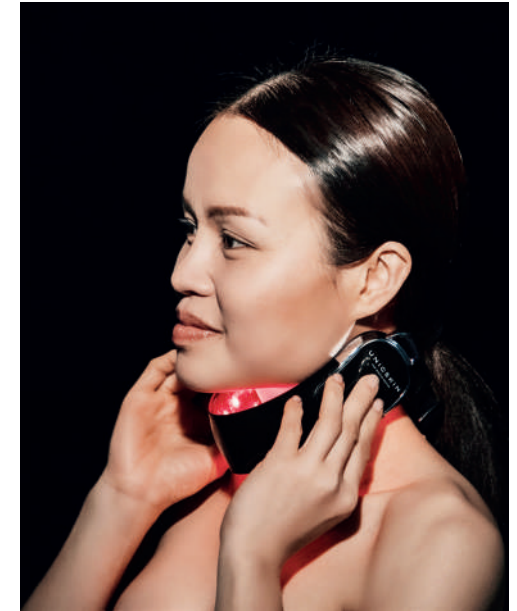

1 DEVICE, 2 MODALITIES, 3 BENEFITS, EACH MODE LASTS 20 MINUTES.

CHIN MODE

Press the power button and choose the "CHIN" Mode (you will see a light on over the word). For 20 minutes, the device will act through the combination of LED lights to effectively perform 2 functions at the same time:

- 1) Reduce double chin
- 2) Jawline slimming: definition of the Jaw Line or V Face

NECK MODE

Press the power button and choose "NECK" Mode (you will see a light on over the word). For 20 minutes, the device will act through the combination of LED lights to **effectively reduce neck wrinkles.**

WHY UNICSKIN

UNICSKIN started out as Monica Sada's personal project. Born into a family of doctors specializing in advanced aesthetics, Monica was raised surrounded by aesthetic medicine. But it was not her upbringing that spurred Monica to create her own international line of Beauty products. **The real trigger was 29 years spent grappling with her own skin ailments. First it was acne. Then came severe atopic dermatitis, hypersensitivity to the sun, psoriasis and a melanoma.** Desperate to find a solution, Monica consulted with leading dermatologists in Madrid and New York, (where she lived for more than 5 years and conceived the idea of our brand) and tested numerous products for her skin; without obtaining the expected results in most of those usually regarded as "quality and luxury products".

So, what was her discovery? That a product's price and packaging or marketing are no reflection of its quality. **Only the ingredients, their concentration and how they are combined have a real bearing on how effective a product is.** Additionally, when skincare routines combine Dermocosmetics with Technology, real results are secured exponentially faster and more visibly. **The introduction of Techno devices in skincare is the future of personalized Beauty,** without the need to go to an aesthetic center.

In 2016, Monica returned to her native Spain; where she visited more than 35 laboratories before finding exactly what she was looking for. **Out of her tenacity and passion, and thrived thanks to the hard work of a superb team of pharmacists and specialists in aesthetic medicine, UNICSKIN was born. Today, a globally awarded Brand, with more than 8 recognitions.** Since its inception, the main purpose of the founder has been to move the Beauty center to each home, facilitating the

lives of modern women and men, accompanying each product with simplified instructions and educational videos **to create an "easy, enjoyable and very effective" world of skin-care.**

If there are no results, it is not valid or acceptable. This is and will always be the basis of UNICSKIN. Our concept of Beauty is based on efficacy, simplification and customization. **We focus on a selection of non-toxic formulas for the skin with a maximum concentration of active ingredients, vitamins and natural plants that, combined with each other and with the latest Beauty Technology, offer excellent results.** We are a contemporary brand, gender-free (100% unisex) and for all ages. We believe that every man and every woman is unique, but with a common goal: **real benefits for their skin.**

What does Monica value most within UNICSKIN? "A great team of magnificent professionals. Without them, nothing would be possible."

Thank you for being part of our unisex and real Techno-Beauty community, and **welcome to the UNICSKIN Universe!**
