ABOUT JETCOIN

Jetcoin is a platform that bridges the relationship between talents and fans.

Built on the Ethereum blockchain, our APP (IOS / Android) provides the opportunity for talents to develop their image grade with the support of their fanbase.

Fans are rewarded with JET. They can use JET to redeem unique lifestyle experiences and social media engagements from our pool of talent.

BENEFIT TO ATHLETES AND COMMUNITY

By sharing a percentage of their future earnings, athletes turn each fan into a social media manager who instantly shares their successes.

Athletes get a social media metric system that can be used to increase their value and secure greater endorsements and sustainable deals with their sponsors.

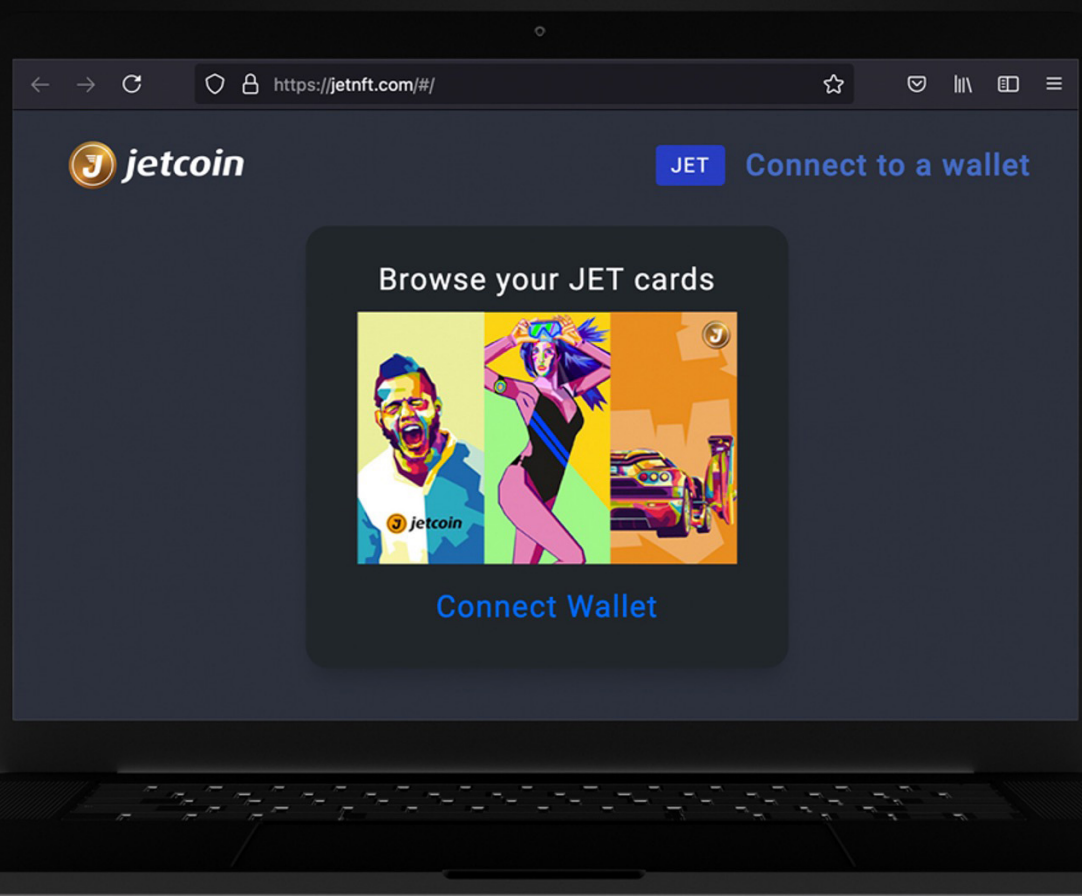

Having a greater fan base directly increases the sale of their merchandise, creating untapped value.
